we supply

Your partner for the Topfinish
Finish for your success

Manufacturer of microblasting equipments
MICROPEEN® / PEENMATIC® and polish
blasting equipments PolishPeen® for
production of defined surface geometries

Production of microblasting equipment
accessories, spare parts, microblasting
agents and process medias

Surface finishing, disc finishing and drag
finishing machines as well as tub vibrators
from ERBA and mass finishing technology
from NovaTech

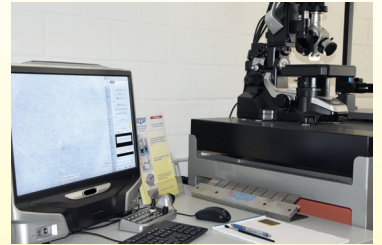

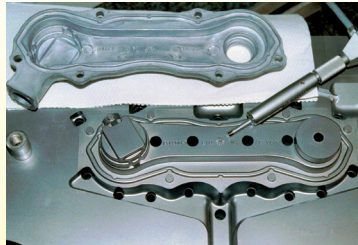

Trade with additives and raw materials

we perform

Your partner for the Topfinish
Finish for your success

Service of galvanic, wear resisting and corrosion resisting coatings HARDALLOY®

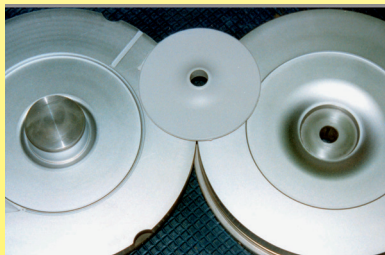

Service of microblasted and tribological surface treatments with IEPCOFINISH®

Properties

- Very good sliding and mould releasing behaviour
- High abrasion resistance with 68-72 HRC
- Corrosion and abrasion stability
- Layer thickness 3-50 µm
- Large ductility for long service lives

Properties

- Removing of finest machine cutting residues
- Optimization of non-adhesive characteristics
- Abrasion free cleaning
- Improve on sliding qualities
- Densification and increase in percentage contact areas

HARDALLOY-W
HARDALLOY-Ni
HARDALLOY-Ni Disp
SLIDEALLOY

Nonabrasive cleaning
Densification / Shot Peening
Deburring
Structuration
Preparation of adhesive surfaces
Tribofinish treatment

Ranges of application

- Rubber, silicone and polyurethane processing
- Plastic and elastomer forming tools
- Additive manufacturing / 3D printing
- Aluminium pressure die casting and extrusion dies
- Punching, cutting, pressing and moulding tools
- Medical and pharmaceutical industry
- Watch and jewellery industry
- Textile, paper and printing industry
- Propulsion technology and engine construction
- Aircraft and vehicle construction
